**G-TECHNOLOGY PUTS A ONE TERABYTE PORTABLE DRIVE IN YOUR HAND**

*Upgrade Your Gear with G-RAID mini, the Industry's First 1TB Portable Drive Offering RAID 0, Massive Capacity, Performance and Durability*

**Macworld Conference & Expo, San Francisco, January 15, 2007 (Booth #S1544) –** G-Technology, Inc. ([www.g-technology.com](http://www.g-technology.com), G-Tech), a manufacturer of premium storage solutions for the Apple® Mac® community that was acquired today by Fabrik Inc. ([www.fabrik.com](http://www.fabrik.com)), announces the industry's first 1TB portable external storage drive, the G-RAID mini with RAID 0.

Complete with the award winning features of its full-sized G-RAID solution shrunk into a portable system, it's a screaming device for mobile content creation applications, traveling with large amounts of data, or for audio/video editing while on the road. G-RAID mini features a triple FireWire 800, FireWire 400 and USB 2.0 interface for universal connectivity to Mac and PC workstations and laptops. The G-RAID mini drives appears to any Mac or PC computer as a single, big and fast disk drive and is ready right out of the box for use with Mac OS X systems.

Real world performance matters most when you are on the road, as well as in the office. With the striping speed of RAID 0 combined with the fastest FireWire interface on the market, FireWire 800, the G-RAID mini easily supports simultaneous playback of multiple layers of video in Apple Final Cut Pro®, Adobe Premiere® and Avid Xpress Pro®. Marry this with the latest disk storage technology, the new Oxford 924 bridge chipset, and a quiet fan and heat sink, and users are guaranteed reliable operation and long life. Easily transportable and encased in an all-aluminum enclosure, it's perfect for video editing on the go.

"G-Technology continues to offer the most powerful external storage solutions available," said Roger Mabon, vice president of sales and marketing for Fabrik's G-Technology product group. "The G-RAID mini is a perfect addition to our family, as it supports our strong following of creative professionals who need reliable, high capacity, high-performance storage."

Available in March 2008, each G-Tech G-RAID mini comes formatted HFS+ and is Time Machine™ ready. G-RAID mini is bus-powered when attached to a FireWire (6 or 9-pin) port, eliminating the need to carry an external AC power supply. Suggested retail pricing has not been set. All drives come with a standard 3-Year factory warranty. For more information, please visit <http://www.g-technology.com>

G-Technology is now a Fabrik company. See announcement here:
